AIR COMPRESSORS

THE NEW FIAC XILENCE RANGE

FIAC’s new XILENCE series delivers greater peace and comfort—without sacrificing performance.

At just 59 dB(A)—like a quiet chat—the XILENCE series supports your work in silence. At its core, a precision-built Italian designed pump drives performance. The XILENCE series offers 1 or 2 hp direct-drive models, delivering up to 9 bar for specialised tools.

XILENCE comes in four tank sizes—6, 20, 24 and 50 litres—for portable or mobile flexibility. Oil-free and direct-driven, XILENCE delivers clean, consistent air with minimal maintenance.

/// Easy maintenance

XILENCE’s oil-free, direct-drive design means fewer service stops and more productivity.

/// Silence and Compactness

A space-saving compressor delivering up to 230 l/min—quiet and efficient.

/// Safety

Protection built in: the pump’s casing prevents contact with hot or moving components.

/// Versatile

XILENCE delivers 9 bar—ready for demanding, precision tools.

/// Plug and Play

Power up fast—on/off switch integrated in the instrument kit.

/// Ideal for a wide range of applications
